Fesnak & Associates, LLP Named a Leading Provider of Accounting Services in U.S.

BLUE BELL, PA,—Fesnak & Associates, LLP (www.fesnak.com), which provides middle-market clients in the mid-Atlantic states with sophisticated accounting, tax and financial services, announced today that it has been chosen by Goldline Research as one of the “Leading Providers in the United States: Accounting Professionals” for 2009. The list of firms will appear in the October 19th issue of Forbes.

“We are very pleased to have received this ‘Leading Provider’ designation,” said Managing Partner Bob Fesnak. “It reinforces our belief that consistently providing a portfolio of quality services to help our clients grow and prosper is absolutely fundamental to our success. We want to share this award with our clients and extend our thanks to them for helping us achieve this recognition.” Established in 2005, and now serving a client base from New York to Washington, D.C., the firm prides itself in combining the sophistication of a national firm with smaller-firm quality service, a “key differentiator”, notes Fesnak.

To make its selection for its list of leading Accounting Professionals, Goldline Research identified more than 1,000 small to mid-sized accounting firms throughout the U.S. Then, the company evaluated each on a number of criteria, including years of experience, client retention and community service activity. Finally, those firms scoring highest were rated on the level of customer satisfaction provided, through interviews with client and business references, to assess professionalism, service and performance.

“There are more than 350,000 accounting professionals in the United States. Quality and client service varies greatly in the industry, and, as a result, many businesses end up making a poor selection when choosing their accounting professional. The firms that we selected provide client service that exceeds the industry standard,” said Victoria Coryelle, analyst, Goldline Research. “We believe these firms are setting the benchmarks for client service for the industry as a whole.”
